- **Refresh**

Updates the information in the window.

Events list

- **Time**

Displays the time when the event occurred.

- **Node**

Displays the node and the cluster on which the event occurred.

- **Severity**

Displays the severity of the event. The possible severity levels are:

- Emergency

Specifies that the event source unexpectedly stopped, and the system experienced unrecoverable data loss. You must take corrective action immediately to avoid extended downtime.

- Alert

Specifies that the event source has an alert, and action must be taken to avoid downtime.

- Critical

Specifies that the event source is critical, and might lead to service disruption if corrective action is not taken immediately.

- Error

Specifies that the event source is still performing, and a corrective action is required to avoid service disruption.

- Warning

Specifies that the event source experienced an occurrence that you must be aware of. Events of this severity might not cause service disruption; however, corrective action might be required.

- Notice

Specifies that the event source is normal, but the severity is a significant condition that you must be aware of.

- Informational

Specifies that the event source has an occurrence that you must be aware of. No corrective action might be required.

- Debug
