LDAP configuration services

You can use System Manager to manage LDAP configurations.

Editing active LDAP clients

You can use System Manager to associate an active LDAP client with a storage virtual machine (SVM), which enables you to use LDAP as a name service or for name mapping.

Steps

1. Click **Storage > SVMs**.
2. Select the SVM, and then click **SVM Settings**.
3. In the **Services** pane, click **LDAP Configuration**.
4. In the **LDAP Configuration** window, click **Edit**.
5. In the **Active LDAP Client** dialog box, select the LDAP client that you want to edit, and perform the following actions:
 - Modify the Active Directory domain servers.
 - Modify the preferred Active Directory servers.
6. Click **OK**.
7. Verify that the changes that you made are updated in the **LDAP Configuration** window.

Deleting active LDAP clients

You can use System Manager to delete an active LDAP client when you do not want a storage virtual machine (SVM) to be associated with it.

Steps

1. Click **Storage > SVMs**.
2. Select the SVM, and then click **SVM Settings**.
3. Click the **SVM Settings** tab.
4. In the **Services** pane, click **LDAP Configuration**.
5. Click **Delete**.
6. Select the confirmation check box, and then click **Delete**.

LDAP Configuration window

You can use the LDAP Configuration window to edit or delete active LDAP clients at the storage virtual machine (SVM) level.

Command buttons

- **Edit**

Opens the Active LDAP Client dialog box, which enables you to edit the properties of the active LDAP client, such as Active Directory domain servers and preferred Active Directory servers.

- **Delete**

Opens the Delete Active LDAP Client dialog box, which enables you to delete the active LDAP client.

- **Refresh**

Updates the information in the window.

LDAP Configuration area

Displays the details about the active LDAP client.

- **LDAP client name**

Displays the name of the active LDAP client.

- **Active Directory Domain Servers**

Displays the Active Directory domain for the active LDAP client.

- **Preferred Active Directory Servers**

Displays the preferred Active Directory server for the active LDAP client.
