System Manager Classic

NetApp December 09, 2021

This PDF was generated from https://docs.netapp.com/us-en/ontap-sm-classic/online-help-96-97/task\_initializing\_complianceclock.html on December 09, 2021. Always check docs.netapp.com for the latest

# **Table of Contents**

Nodes	
Initializing the ComplianceClock time	
Nodes window	

# **Nodes**

You can use System Manager to view the details of the nodes in the cluster.

# Initializing the ComplianceClock time

You can use System Manager to initialize the ComplianceClock time to the current cluster time. You must initialize the ComplianceClock time in order to create SnapLock aggregates.

# Before you begin

The SnapLock license must be installed.

#### About this task

You cannot modify or stop the ComplianceClock time after it is initialized.

### **Steps**

- 1. Click Storage > Nodes.
- 2. Select the node, and then click Initialize ComplianceClock.
- 3. In the **Initialize ComplianceClock** dialog box, click **Yes** to initialize the ComplianceClock time to the current cluster time.

# **Nodes window**

You can use the Nodes window to view the details of the nodes in a cluster.

## **Command buttons**

Initialize ComplianceClock

Initializes the ComplianceClock of the selected node to the current value of the system clock.

Refresh

Updates the information in the window.

# **Nodes list**

Name

Displays the name of the node.

State

Displays the state of the node (whether the node is up or down).

Up Time

Displays the duration for which the node is up.

#### ONTAP Version

Displays the ONTAP version that is installed on the node.

## Model

Displays the platform model number of the node.

# System ID

Displays the ID of the node.

## Serial No

Displays the serial number of the node.

# **Details** area

Displays detailed information about the selected node.

#### · Details tab

Displays information related to the selected node such as the name of the node, the state of the node, and the duration for which the node is up.

#### Performance tab

Displays the throughput, IOPS, and latency of the selected node.

Changing the client time zone or the cluster time zone impacts the performance metrics graphs. You should refresh your browser to view the updated graphs.
